Education

- **GLA University, Mathura** Aug 2023 – May 2027
B.Tech in Computer Science Engineering **CGPA: 7.72/10**

Experience

- **KVCH – Full Stack Development Training** Jun 2025 – Aug 2025
Built full-stack application functionality using **Java, Spring Boot, Node.js, Express.js, React.js, and MySQL**. Developed and integrated **RESTful APIs**, CRUD workflows, request validation, authentication-related application logic, and database operations. Worked with Git/GitHub and Postman to debug API workflows, validate responses, and improve application reliability.
- **NeuroNexus Innovations – Web Development Intern** Apr 2025 – Jul 2025
Developed backend services using **Node.js and Express.js**, creating REST APIs for application workflows and database operations. Implemented request validation, CRUD functionality, error handling, and API integration. Used **Postman** for API testing and debugging while working with Git/GitHub and collaborating on web application development.

Technical Skills

- **Programming Languages:** Java, JavaScript, Python, SQL, C, HTML5, CSS3
- **Frontend:** React.js, JavaScript, Bootstrap, Tailwind CSS, Responsive Web Development, Component-Based UI
- **Backend:** Node.js, Express.js, Spring Boot, RESTful API Development, CRUD Operations, API Integration
- **Authentication & Security:** JWT, Authentication, Authorization, Request Validation, Error Handling
- **Databases:** MySQL, MongoDB, SQL, Database Design, Queries, Data Validation
- **Development Tools:** Git, GitHub, Postman, Maven, IntelliJ IDEA, Vite
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Projects

- **Retail Billing Software – Full-Stack POS System** [GitHub]
Developed a full-stack application using **Java, Spring Boot, React.js, REST APIs, and MySQL** for product, customer, billing, transaction, and order management. Designed reusable frontend components and integrated them with backend APIs. Implemented **CRUD operations, input validation, exception handling, business logic, and database queries**. Tested API workflows using Postman and debugged issues across frontend, backend, and database layers.
- **Smart Attendance Management System – Full-Stack Web Application** [Live] [GitHub]
Built a role-based web application using **React.js, Node.js, Express.js, MongoDB, and JWT**. Developed RESTful APIs supporting student, faculty, and administrator workflows. Implemented **JWT authentication, role-based authorization, CRUD operations, request validation, and error handling**. Integrated frontend components with backend services and database operations, and validated API behavior using Postman.
- **AI-Powered Movie Recommendation System** [GitHub]
Developed a responsive full-stack recommendation platform using the **MERN stack** with React.js, Node.js, Express.js, and MongoDB. Integrated external APIs and a Generative AI service to support interactive movie discovery. Implemented reusable React components, backend API integration, data retrieval workflows, and responsive user interfaces.

Leadership & Achievements

- **Peer Mentor – University Coding Club:** Guided **80+ students** in Data Structures and Algorithms, Web Development, and interview preparation through mentoring sessions and study groups.
- **Team Leader – Smart India Hackathon 2024:** Led a **6-member team**, coordinating project planning, feature development, technical discussions, and final system deployment.
- **1st Rank – College Coding Contest:** Secured first rank in a university coding contest organized by the University Coding Club.
- **500+ DSA Problems:** Solved 500+ algorithmic problems across LeetCode, GeeksforGeeks, and HackerRank.

Certifications

- **Full Stack Development Using Java – KVCH**
- **Software Development – NPTEL**
- **AI Fundamentals – Oracle University**
